**WATERMARK LEARNING BECOMES A MICROSOFT® PROJECT SOLUTION PROVIDER**

**Edina, Minnesota, March 7, 2003**

Edina-based business and technical training company Watermark Learning is proud to announce that it has attained the status of Microsoft® Project Solution Provider. Microsoft Project is the premier software tool used by project managers to manage their projects efficiently. The Microsoft Project Solution Provider Program is designed to assist solution providers who provide quality Microsoft Project-based extension products and services to customers worldwide.

“Watermark is very excited to have been selected to be a member of this program,” noted Chris Anderson, Vice President of sales. “We pride ourselves on being able to offer the most comprehensive training for our customers. As a Microsoft Project Solution Provider, Watermark will be invited to participate in Microsoft Project Technology Briefings and learn Microsoft’s future plans for the software. We’ll be able to incorporate these enhancements into our training materials, ensuring that our students learn to use the tool at an expert level.”

Watermark offers an extensive project management curriculum and supports Microsoft Project through its **Microsoft Project 2000** and **Microsoft Project 2002 for Project Managers** courses.

For additional information on Watermark Learning, or the learning solutions we offer, visit our Web site at [www.watermarklearning.com](http://www.watermarklearning.com) or call 952.921.0900 or 800.646.9362.
