

Agile

Agile Practitioner Certificate

Includes
ScrumAlliance®
endorsed courses

"This was by far the best continuing education experience I have been exposed to in a very long time. The instructor was very knowledgeable about the subject matter as well as passionate about teaching it to others. Both of these elements made for an extremely informative as well as enjoyable experience. Thank you for such a wonderful learning experience. This makes bragging about Watermark Learning a no-brainer!"

Corinne Meshbesh, ScrumMaster student

NOTE: Classes may also be purchased individually.

This 3-course certificate program is designed for core Agile team members: project managers, business analysts, product owners, ScrumMasters, project coaches, and software developers. All participants take either Agile/Scrum Crash Course or Agile Business Analysis, plus Influencing Without Authority and one elective course. Develop the skills required to be successful in an Agile environment.

REQUIRED COURSES

Agile/Scrum Crash Course

Two-day interactive workshop enables participants to understand their role within the Scrum team structure and learn tools to successfully implement Scrum.

OR

Agile Business Analysis

Become successful on Agile projects in a business analyst role. Use Scrum processes to help product owners write and prioritize user stories and obtain details needed for Team user stories.

AND

Influencing Without Authority

Learn to establish enough influence over team members and other key stakeholders to get work done when you have no "real" authority over them, a constant need with self-directed teams.

ELECTIVES (select one)

- Agile Planning and Estimating
- Certified ScrumMaster
- Certified Scrum Product Owner

IBA Endorsed Education Provider™

PMI Project Management Institute

ScrumAlliance®

Agile Alliance

BRMP BUSINESS RELATIONSHIP MANAGEMENT PROFESSIONAL TRAINING ORGANIZATION ACCREDITED BY @APMG International
