About Watermark Learning

Since 1992 we have provided training that turns the complexity of industry standards into practical application of business analysis, project management, agile, and business process management. Our courses concentrate on critical skills to enhance performance and lead to enduring results in organizations. Our classes are practical and engaging rather than academic. We apply our extensive industry experience to concentrate on the skills needed to be effective. Our instructors facilitate interactive case studies in class that energize students to learn and motivate them to perform.

This 5 day certificate program is designed for core Agile team members: Scrum masters, project managers, business analysts, product owners, project coaches, and software developers. All participants take the 3 day Agile Bootcamp Using Scrum. Choose the BA or PM 2 day course to complete the program. These courses develop all the skills required to be successful in an Agile environment, including planning, estimating, managing, eliciting, analyzing, and validating business needs and requirements.

REQUIRED COURSES

Agile Bootcamp Using Scrum (3 days)

This three day interactive workshop provides everything the Scrum team will need to get started. The course enables participants to understand their role within the Scrum team structure and equip them with the knowledge, skills, and tools to successfully implement Scrum.

AND

Agile Business Analysis (2 days)

This two day workshop provides the essential information needed for those in the business analyst role to be successful on Agile projects. Participants will use Scrum processes to write and prioritize user stories and get the detail needed for the Team to plan and build user stories.

OR

Agile Planning and Estimating (2 days)

This course is designed for both new and experienced project managers who are transitioning to an agile role, and need to learn how to successfully apply agile methods to their projects and programs.
